TUBLIGHT®

Intelligent tubular skylights

Tublight® can be used on all tiled roofs with a maximum pitch of 45° and with all other roof coverings on a roof with maximum pitch of 15°.

DAYLIGHT IN EVERY ROOM

This is a particularly ingenious innovative product !

TUBLIGHT® is the ideal solution for bringing natural light into the darkest of places, even those places that are not directly under the roof : half-storeys, bathrooms, toilets, landings, and stairways.

TUBLIGHT® channels the light and transports it via a duct with a highly reflective **silver lining** to the room witch you would like to brighten with natural light.

ADVANTAGES

- ➤ Saves on electrical lighting
- ➤ Daylight even in those places where that seems impossible.
- ➤ Secure against burglary
- ➤ Easy to install

With a light flow of 70%, TUBLIGHT®, provides 500 Watt light in clear weather during summer. This allows you to light up a 12m² room.

Skylights

The SEDPA skylight is a solution for bringing daylight into rooms in pitched roofs.

The standard dimensions are: 45 x 55 and 45 x 73cm. The double glazed window provides excellent sound proofing and heat insulation.

This skylight can be fitted into any type of roof, whether slate or tiled. A drainpipe is integrated into the unit.
